

AT-35 Analogue Telephone

AT-35 Analogue Telephone cost effective feature access

A hard working versatile solution, the AT35 provides simple feature access with CID in a cost effective, streamlined package. The AT35 is an ideal alternative to a multiline digital phone when feature access is required at a lower cost.

One Touch Simplicity

Access to frequently dialed numbers and features is made simple through 15 one touch memory keys, while a two way speakerphone is ideal for those areas of the business that require a hands on approach. With a built in message waiting indicator and parallel connection for modem and fax, the AT35 provides a perfect solution for hotel guest rooms and conference centres.
