

The telephony choice for small business

Xen Topaz

No matter how good your products or services are, your success is ultimately determined by how well you look after your customers. Xen Topaz gives you the features you need to present an efficient, polished service to your customers. You can start small and build your system up to 24 extensions with nine PSTN and/or eight ISDN lines.

Easy expansion

The Xen Topaz system can meet the ever-changing communication demands of businesses. As your needs expand, the system can grow with you through simple upgrades

Faster, streamlined customer service

Xen Topaz incorporates many clever functions that speed up the call handling process. Department calling distributes calls evenly to assigned staff using either priority or circular routing to staff. Calling name display can identify a caller's name or distinctive ringing indicating whether the call is either internal or external, so that you can answer with an appropriate greeting. If lines get too busy, automated attendant can answer calls with a tailored message and press-button options to guide the caller to the most appropriate staff member. Xen Topaz's eight port integrated digital voicemail offers either 3.5 or 7.5 hours of storage capacity and a host of call handling options including "Park and Page," which lets a caller page you before leaving a message. You can also record conversations, for training purposes. You can save on call costs with Automatic Route Selection (ARS) and track costs with the Call Accounting feature.

Terminal options

16 button non display

22 button non display

16 button display

22 button display

Easy maintenance

The Xen Topaz's compact hardware takes up minimal space and is designed to minimise communications downtime during maintenance and/or expansion. With user-friendly PC-based programming utilities, customers can easily perform their own moves, adds and changes.

Terminals features

Easy to read

Large liquid crystal display with contrast control shows time, date, number called and extension number

Speaker

When in handsfree mode

Last number dialed

View the last 10 numbers dialed

Do Not Disturb/ Conference

Volume adjustment

Handsfree microphone

360 visual indicator

Flashing red light allows you to see your telephone ringing

'Your call' colour lights

Your calls are green, others are red, so you only pick up the calls you meant to
